OBJECTIVE

Passionately driven by innovation, I thrive on creating secure, scalable, and impactful solutions that blend intelligent design with real-world problem-solving through data and smart systems

EDUCATION

- Bachelor of Engineering | BMS College of Engineering, Bengaluru | 2022-2026 **CGPA/Percentage: 9.1**
- Higher Secondary Education (12th) | J.N.V HASSAN(CBSE) | 2020-2022 **CGPA/Percentage: 87%**

EXPERIENCE

Samsung || *Research and Development Intern* || Bengaluru

May 2025– present

- Optimized AGFormer (GCN-Transformer) with spatio-temporal transformers and proxy streams.
- boosting performance by **2%** and reducing latency by **20%**

Crush Holidays || *Frontend Developer Intern* || Bengaluru

Nov 2024 – Feb 2025

- Engineered and optimized React.js components, **leveraging Redux for state management, Framer Motion** for animations and Tailwind CSS for responsive styling.
- Orchestrated deployment and domain configurations, troubleshooting domain-related issues to ensure a seamless online presence.

No Offense But || *Web Developer Intern* || Bengaluru

Jan 2024 – April 2024

- Engineered and optimized secure MERN-based API endpoints and **integrated React Quill** for efficient content management and improved performance.
- Implemented secure authentication, reducing unauthorized access **by 50%** and improving user security.

PROJECTS

Secure Vote: Cryptography-Based E-Voting System || [Try It](#)

Nov 2024-Feb 2025

- Tools & Technologies Used:** React.js, Tailwind CSS, Node.js, Firebase, MongoDB, SHA Encryption, Face Recognition
- Developed a secure e-voting system integrating Aadhaar authentication, face recognition, and cryptographic techniques to enhance election security
- Implemented SHA encryption to protect voter data and blockchain-like verification for transparent and fraud-resistant elections.

Automatic Railway Gate Handler: IoT-Based Smart Railway Crossing || [Try it](#)

Jan 2024- Mar 2024

- Tools & Technologies Used:** ESP32, Ultrasonic Sensor, Servo Motor, Firebase, Java, Arduino IDE
- Designed an IoT-based Automatic Railway Gate Handler with ESP32 and a Java-Firebase app for real-time automated control and remote monitoring.

Campus Gate: Smart Access Control System || [Try it](#)

Oct 2023- Feb 2024

- Tools & Technologies Used:** React.js, Node.js, Firebase, and MongoDB
- Developed a secure department website with role-based authentication, restricting access to department students and ensuring data integrity and Built admin-controlled PDF management

SKILLS

Languages	C, C++, Python, SQL
Frameworks	React, Next.js, Pandas, NumPy, Scikit-Learn,
Frontend Technologies	HTML, CSS, JavaScript, UI/UX Design
Backend Technologies	Node.js, Express, REST API, Postman
Tools	Git, GitHub
Database	MySQL, MongoDB, Firebase
Network Security Tool	Wireshark, Metasploit
Cryptographic	SHA-256, AES, RSA, HMAC, Digital Signatures
Machine Learning	TensorFlow, PyTorch, OpenCV, Pandas, Transformers, GCNs, NLP, Clustering, Random Forest

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification** (Coursera: April 2025)
- Advance Learning Algorithms** (Coursera: May 2025)

ACHIEVEMENTS

- Secured 2nd place** in a Machine Learning Hackathon organized by the **IEEE Cell at NITK**.
- Chosen among the top **200 out of 50,000+** applicants for **JPMorgan Chase's Code for Good hackathon**.
Built a scalable, cost-effective solution for the **NGO Sensing Local** to tackle a real-world civic issue

RESPONSIBILITIES

- Web Developer at **The Big Foundation**, BMSCE's E-Cell, where **I led the design and development** of impactful digital platforms to promote **entrepreneurship**.
- Core Committee Lead at Augment AI Club**, organizing AI workshops, speaker sessions.
